

Regulatory Update and Press Review

Pharmaceutical companies must keep constantly updated on news and communications released by Health Authorities in order to adapt and act promptly to satisfy updated regulations. Furthermore, Companies often need to monitor competitors and be informed about the main developments in the pharmaceutical market.

IQVIA is a partner able to provide support and respond to the Customer's needs. Thanks to an expert Team, IQVIA provides a collection and a complete overview of regulatory updates and news published on the main websites of the Health Authorities and pharmaceutical magazines.

The Team creates a **daily** or **weekly newsletter**, through an evaluation and screening of the most interesting news.

Every day, the newsletter is created by consulting a list of carefully selected websites, which are periodically evaluated and reviewed by IQVIA. However, IQVIA also offers the possibility to **customize** the newsletter according to the needs of individual Companies, such as focusing on a group of products, specific therapeutic areas or evaluating the screening of additional sources.

The main websites consulted for the newsletter are:

AIFA

EMA

Ministry of Health

EFSA

Istituto superiore di sanità

Italian Official Journal — General Series

This service provides to Pharmaceutical Companies:

- **Timely update** on the most relevant news, enabling them to adapt and act promptly to satisfy the updated legislation;
- **Time saving** in information research by already having a complete overview of all the news;
- **High quality service** delivered by a dedicated team capable of carefully consulting, evaluating and selecting the most important news.
