

IQVIA Healthcare-Grade AI[®] Translation for Life Sciences

Effectively scale across any market

Accurate — Scalable — Compliant

Healthcare organizations must act quickly while maintaining regulatory standards and patient involvement. **IQVIA Language Solutions** uses Healthcare-grade AI[®] to overcome language and regional barriers, enabling clear communication and efficient study start-up, patient engagement, and global execution, with an emphasis on quality and compliance.

IQVIA integrates clinical machine translation with expert human review, delivering fast and accurate translations that meet rigorous industry standards. By embedding Healthcare-grade AI[®] directly into its language solutions workflows, IQVIA enhances quality, consistency, and efficiency, ensuring patient safety, data integrity, and regulatory compliance always remain top priorities. This intelligent combination of automation and human expertise enables quicker, reliable, and scalable global support, empowering life sciences organizations to operate with confidence and compliance at every stage.

Language solutions for every stage of your product lifecycle

IQVIA supports every stage of the product lifecycle with integrated translation and linguistic validation services:

Clinical and regulatory: Protocols, ICFs, COAs/eCOAs, regulatory dossiers, labeling, SAE reporting

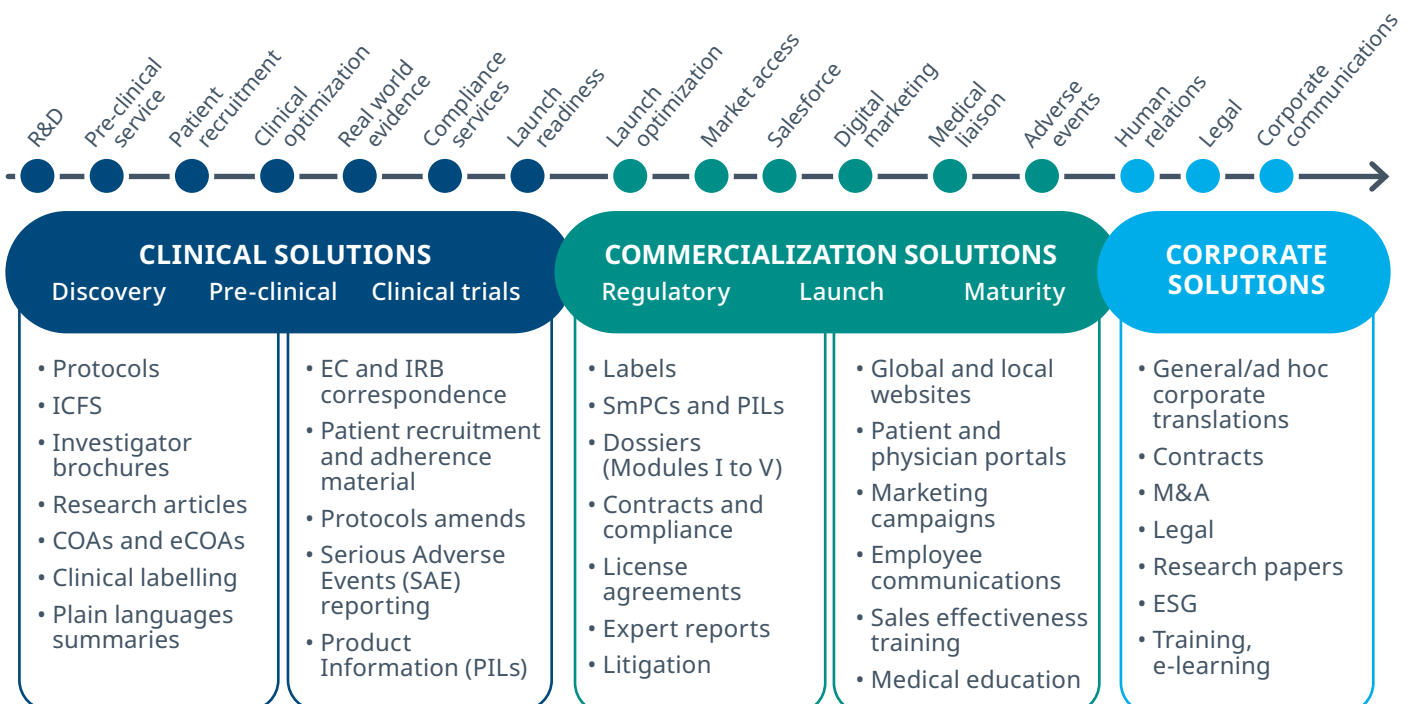

Patient engagement: Recruitment and retention materials, patient-facing content, plain language summaries

Commercialization: Marketing campaigns, medical education, market access, loss of exclusivity, and HEOR materials

Corporate and legal: Contracts, compliance documentation, internal communications

Rely on our unmatched life sciences expertise

Our exceptional accuracy and speed mean no missed deadlines, no re-submissions, and ultimate integrity in the uncompromising environment of healthcare.

Powered by Healthcare-grade AI®

IQVIA's proprietary AI ecosystem enhances every step of the translation workflow:

- **Speed:** Accelerated timelines with AI-assisted workflows and automated post-editing. IQVIA's latest AI innovations, ETA (eCOA Translation Accelerator) and OMEGA (Optimized Migration for eCOA via Generative AI), respectively reduce average turnaround times by 42% and 49%
- **Quality:** Domain-trained models ensuring accuracy and consistency across languages. Qualified linguists, with quality standards, human review supported by AI
- **Compliance:** Secure, GxP-ready processes with full auditability. Reducing turnaround times without compromising quality
- **Efficiency:** Scalable AI + human expertise. Faster operations, fewer errors, and more consistent delivery

Proven life sciences expertise

IQVIA combines deep therapeutic expertise with global delivery capabilities:

- **Track record:** 450 customers across the industry, including 95% of large pharma who trust us for their translations
- **Life sciences expertise:** As the #1 clinical translation provider with 100% life sciences focus, IQVIA covers 30+ therapeutic areas
- **Global presence:** With 20 offices and locations in 17 countries, we offer services in 170+ languages and have 7 hubs worldwide
