- Automated CTA ingestion improves accuracy and productivity, reducing errors and cost.
- Robust analytics and reporting ensure complete transparency for sponsors and sites.

A smarter, faster, seamlessly integrated solution

End-to-end

A portfolio of SaaS and tech-enabled solutions for budgeting, forecasting, payments and contracting.

Global experience and expertise

Ensure accurate, timely, and compliant payments anywhere in the world.

Flexibility

Utilize existing solutions with seamless integration or complement and enhance processes with IQVIA solutions.

Innovative, easy-to-use technology

Intuitive user interface (e.g., payments portal) and deep clinical trials financial management experience enables speed and responsiveness to change.

AI-driven

Utilizes AI to automate manual and repetitive tasks. AI-driven CTA processing significantly improves accuracy and productivity so teams can focus on more valuable activities.

Robust analytics and reporting

Including compliance, dashboards, and self-service analytics for operational reporting ensure complete transparency.

Added IQVIA Healthcare-grade AI® integration boosts your bottom line.

CTA processing with IQVIA Healthcare-grade AI®

Automates ingestion, quality checks, parsing and extraction of critical information, and populates payment systems, eliminating error-prone manual data entry. By optimizing site payments and financial processes, sponsors can enhance site satisfaction, improve trial efficiency and drive greater cost savings.

Case study: CTA processing with IQVIA Healthcare-grade AI®

\$3M

Projected annual savings for high-volume (100 trials/year+) sponsors

Assumes 2 CTAs per site and 200 sites per trial
