

Intelligently driven end-to-end eQMS that integrates, simplifies and automates

Quality, Regulatory and Safety Solutions

Global regulations continue to evolve and diverge, which brings complexity to market access and commercial growth activities. Additionally, the advancement of innovative healthcare solutions that combine multiple product types are driving increased complexity. Now, more than ever before, Quality, Regulatory and Safety professionals need to act with focused precision to support a companies' growth and compliance activities

101k+

Global Regulations and Reference Documents¹

44%

increase in reference documents within the last 5 years¹

Every 20 minutes a new or changed regulation or reference document is published somewhere in the world¹

Integrated quality, regulatory and safety workflows that align with professional activities

With IQVIA's integrated quality, regulatory and safety technologies, you can increase collaboration across functions and improve the efficiency of your professional teams by reducing the administrative burden of core workflows. Connected Intelligence drives insights that support the augmented professional in daily activities and in meeting US 21 CFR, MDSAP, ISO 13485 and global regulatory requirements.

Simplify, Automate, Integrate

Stay ahead of global regulatory and compliance changes

IQVIA's solutions enable companies to ensure the focus on product quality and patient safety is optimized throughout the design, manufacture, sale, and distribution activities, and that global and local requirements are met throughout the product lifecycle.

Intelligent automation driving Quality, Regulatory and Safety efficiencies and insights

Leverage technology for efficiency and productivity

Automation reduces manual, highly repetitive tasks to focus scarce resources on higher-value activities. Connected Intelligence embedded in standardized processes drives compliance, through augmenting the quality, regulatory and safety professionals with intelligent insights and transformational process workflows.

Unparalleled scale and expertise in Quality, Regulatory and Safety solutions

Unleash the power of IQVIA Connected Intelligence™

IQVIA's Connected Intelligence and advanced analytics yields a multitude of benefits, including improved efficiency in resource allocation, increased effectiveness in standardized processes, compliance, and customer engagement, as well as transparency of operations to important stakeholders.

Transform healthcare and patient outcomes

Through a collaborative partnership with IQVIA, you can drive team efficiency, introduce safe and effective products to market faster and accelerate the path to a healthier world.
