

IQVIA Connected Compliance for Regulatory Intelligence and eQMS

Optimize your compliance processes with the SmartSolve® Regulatory Connector

The situation and impact

Life sciences companies are changing the way they stay compliant. A proliferation of regulations, products, markets and data sources — combined with intense cost pressures — means that compliance functions must go beyond merely following rules, and deliver more value to the business.

of global sciences CEOs consider industry regulations to be a top disruptive business trend

annual increase in reported adverse events

new regulations issued by the FDA alone since 1998

Disconnected legacy systems, point solutions, inconsistent data, no single source of knowledge

A new vision for regulatory and quality compliance

HEIGHTEN PERFORMANCE AND EFFICIENCIES. INCREASE VALUE

Orchestrate your success across the complete compliance lifecycle. IQVIA Connected Compliance for Regulatory Intelligence and eQMS removes silos, reduces overall cost and improves productivity and compliance accuracy, keeping you ahead of change so you can add more value to your business.

Optimize your organization's compliance processes and reduce overall cost, with IQVIA SmartSolve Regulatory Connector.

- ✓ **Improve compliance accuracy**
- ✓ **Increase productivity**
- ✓ **Remove silos**
- ✓ **Reduce overall cost**

Lower your burden. Boost operational compliance

Simplify, automate and integrate your compliance response times, accuracy, predictive planning and efficiency. Employ IQVIA's innovative technologies, decades of life sciences experience and advanced analytics — including artificial intelligence (AI) and machine learning (ML) — to glean key insights and make better decisions. Focus more resources on higher value activities.

EVERYTHING YOU NEED TO PERFORM REGULATORY IMPACT ASSESSMENTS IN ONE PLACE

It connects SmartSolve Document Management, SmartSolve Change Management and IQVIA Regulatory Intelligence in a guided, seamless and automated regulatory workflow to improve productivity, efficiency and accuracy.

IQVIA's SmartSolve Regulatory Connector module is a simple yet powerful end-to-end compliance workflow that automates an organizations compliance review process. With minimal setup to allow for focused detection of regulatory changes, it generates SmartSolve Regulatory Alerts that include not only the Regulatory Intelligence Documents but also the SmartSolve QMS Documents that could be impacted by regulatory changes — placing them on the SmartSolve Dashboard for easy access, review and approval to process the documents through the SmartSolve Change process.

POLICY-DRIVEN GUIDED WORKFLOWS

Guides the regulatory workflow process and is automated for improved productivity, efficiency and accuracy.

LEVERAGES SMARTSOLVE ECOSYSTEM

Connects SmartSolve Document Management, SmartSolve Change Management and IQVIA Regulatory Intelligence.

CENTRALIZED ACCESS TO DATA

Everything you need to perform regulatory impact assessments is available in once place. Closed loop access for customers to access quality and regulatory documents.
