

# IQVIA eSubmission Validator

*Verify your technical compliance ahead of submission*

## Better manage submission risk

When it's time to dispatch your documents to a regulatory agency, it's time to validate. Some companies may even validate using two different tools. Why risk losing precious time and money over technical issues? Always validate before submitting.

### IMMEDIATELY ENSURE TECHNICAL COMPLIANCE

**IQVIA eSubmission Validator** is a multi-region application that assures technical compliance with regulatory agency requirements around the world

- Allows users to quickly and easily validate their regulatory submissions prior to actual dispatch
- Significantly minimizes risk of refusal to file or rejection due to technical issues
- Based on specifications and validation criteria published by regional authorities and ICH
- Designed to validate electronic Common Technical Document (eCTD) and Non-eCTD electronic Submissions (NeeS) standards-based documents
- Comprehensive report clearly shows users valid and invalid results including details as specified by the regional agencies
- Available as stand-alone or server-based application
- Now supports CTD 4.0 validation criteria

#### SUBMISSION RISK MANAGEMENT

Verify that your submission meets regulatory agency technical requirements prior to dispatch avoiding refusal to file or rejection

#### IMMEDIATE FEEDBACK

Receive complete report detailing status and any issues that require correction; up to 2 times faster than other available validation tools

#### EASE OF USE

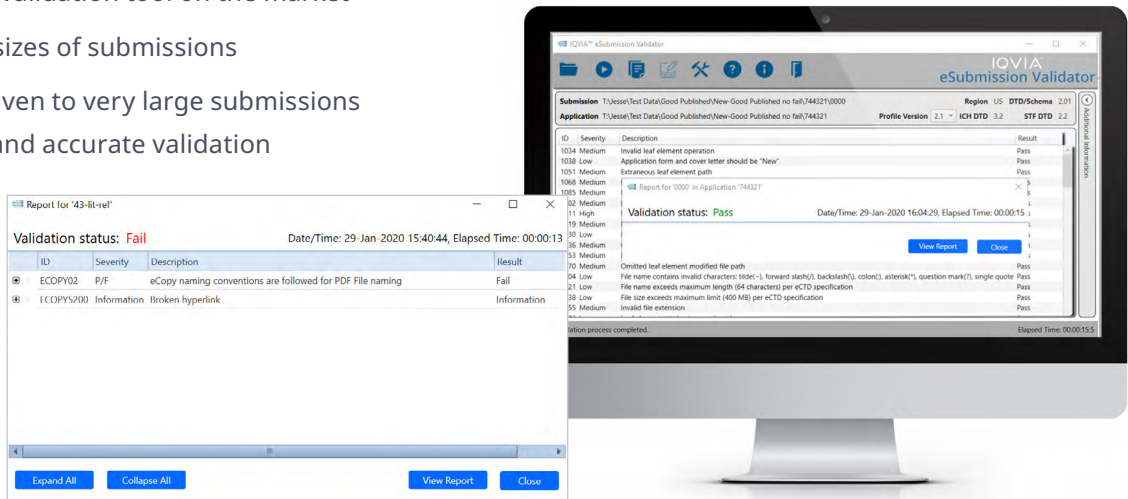

Simple, intuitive user interface that doesn't require extensive training

## GET THE DETAILS

- Uses standard settings based on each country or region along with the DTD version of the submission
- Has the flexibility to let users validate selected module(s) and/or specific required set(s) of criteria (e.g. criteria related to PDF files only)
- Verifies and reports findings; does not modify submission content in any way
- Designed to deliver high performance and highly accurate reports

## PERFORMANCE

- Completes validation process up to 2 times faster than any other validation tool on the market
- Works with all sizes of submissions
- Special focus given to very large submissions to ensure fast and accurate validation

## VALIDATION REPORTS

Reports generate well-organized Microsoft® Excel workbooks providing:

- Validation details
- Error details (if any)
- Submission statistics

## GEOGRAPHIC COVERAGE

Available for: U.S., Canada, 28 EU EMA countries, Australia, Switzerland, Japan, Gulf Cooperation Council (Saudi Arabia, Kuwait, United Arab Emirates, Qatar, Bahrain, Oman), Jordan, South Africa, Thailand, China, South Korea
