

GrantPlan for Investigator Initiated Studies

Forecast and evaluate Fair Market Value with the only cost benchmarking solution dedicated to Investigator Initiated Studies

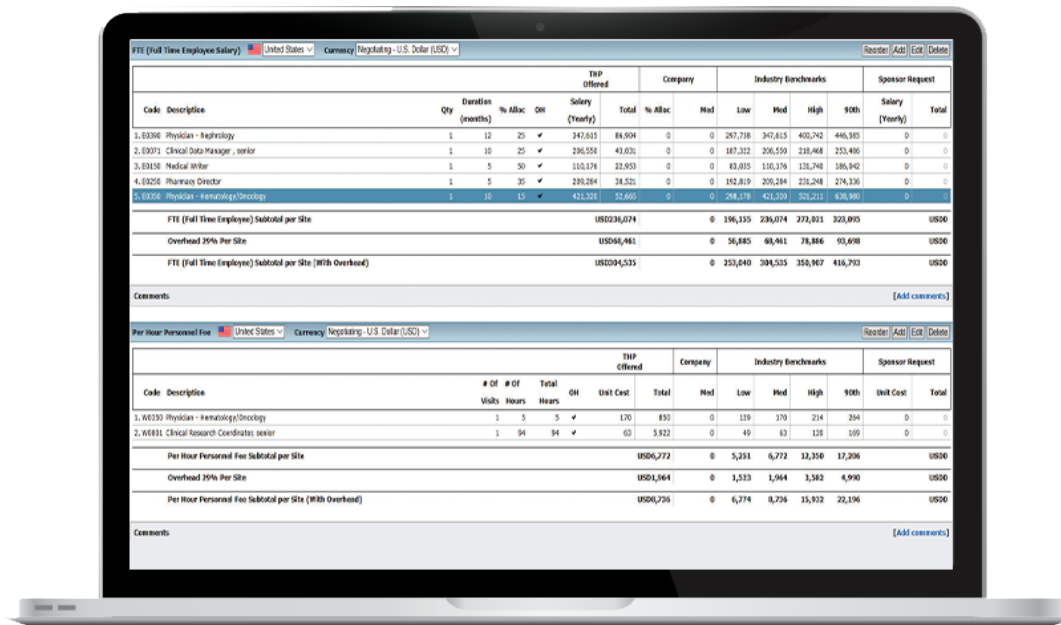

Assess Fair Market Value of IIS Grants

GrantPlan for Investigator Initiated Studies (GPI) is the global solution that specializes in the budgeting and assessment of Fair Market Value (FMV) for Investigator Initiated Studies (IIS). GPI allows Sponsor companies the ability to confidently steer their competitive IIS assessments while ensuring they fall within the appropriate cost benchmarking range.

GPI is designed to create an unparalleled level of transparency and collaboration between Investigators and Sponsor companies.

Simplify submission, evaluation, budgeting, and negotiation times with a clear path for:

- (FMV) on a granular level, including personnel fees (per hour and FTE)
- FMV from industry and company historical data
- Best practices from subject matter experts and industry thought leaders
- Version control, including amendment management
- Central repository for budgets and executed financial details
- Evaluate proposals against appropriate benchmarks
- Negotiate from a position of confidence
- Budget with a clear path to timely study completion
