

IQVIA Health Data Access

Supporting integrated health data export and analysis with easy-to-use self-service applications

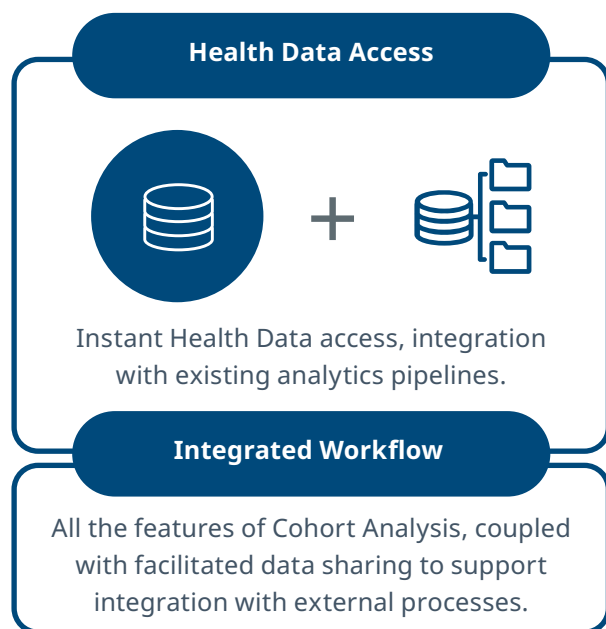

Do you want to access diverse, global, comprehensive data sets? Do you want to improve efficiency with access to innovative and sophisticated analysis tools?

IQVIA Health Data Access can help.

Accelerate and enhance your analysis with Health Data Access, a powerful and secure self-service Real World Data sharing solution. Seamlessly enable rapid analysis

and define custom patient feature extractions to shape and deliver analytical-ready data for your pipelines with multiple delivery options such as Snowflake™, AWS S3, and more.

Alternatively, with our Direct Data Delivery, you can directly download, host, and access available data assets for use in your custom analysis.

Fast access to refreshed datasets

Identify patient populations in less time

Immediate Snowflake data access and connectivity

Enhanced process integration opportunities

Flexible Delivery Options

Self-Service

License

Access the largest proprietary real world data collection

Our network of over 25 ready hosted datasets is globally sourced and ready for immediate provisioning. The world's largest collected source of patient data, combining EMR, Open/Adjudicated Claims and Longitudinal Prescription records from America, Asia, Europe, Australasia, and South America.

Types of data

EMR, longitudinal prescription, adjudicated claims, hospital EMR

Access IQVIA datasets or easily provision your own

Rapid data integration

Hospital claims
open-source claims

1.2 Billion
patients

Events
76 Billion

Worldwide
coverage

Example Datasets

- OMOP
- Pharmetrics Plus
- Ambulatory EMR
- US Oncology
- LRx Dx
- Disease Analyzer
- IQVIA Claims (Japan)
- IMRD

Rapidly access, identify and transform large scale global health data

Managed data provisioning and refreshes
Get access to refreshed data sets fast

Rapid patient population identification
Identify your patient populations in less time

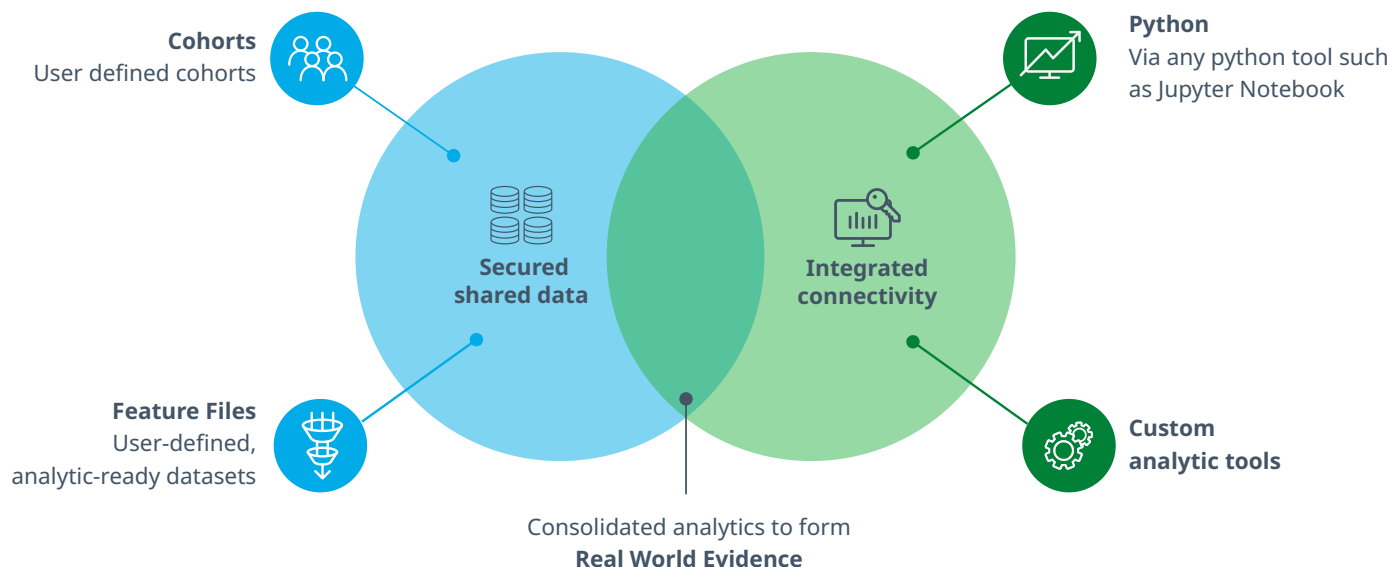

Seamless Snowflake™ data sharing
Gain immediate data access and connectivity

Enhanced process integration opportunities
Enhance and extend your existing process via improved integration and multiple data sources

Health Data Access — unlock time for analytics and insights

With Health Data access, you can securely export and share data

Flexible pay-per-use pricing plans enable you to scale up or down to meet the changing needs of your projects

Make faster and more informed decisions with our single-vendor solution. Leverage the highest quality data available and flexible pricing plans that allow you to access what you need to succeed when you need it.

Takeaways

- Define custom patient feature extractions to shape and deliver analytical ready data directly for your analytical pipelines with multiple delivery options (Snowflake, AWS S3, etc.)
- Improve efficiency, promote collaboration, and empower your teams with centralized access to even the largest IQVIA data sources
- Remove barriers to collaboration and improve access to multiple IQVIA global health data assets

IQVIA Analytics Research Accelerator

A complete solution for cross-functional teams, effortlessly unlocking exclusive Real World Data and delivering rapid analytic capabilities. From data landscaping to real-world insights and evidence generation, this solution empowers teams to streamline analytics and generate reliable insights efficiently.
