

IQVIA Local Affiliate Product Services (LAPS)

End-to-end solutions with regulatory-focused medical experts and leading technologies to support your local safety needs and drive consistency with global requirements

IQVIA has provided tailored local affiliate solutions for large, mid-size, and emerging life sciences companies for over 15 years in more than 170 countries.

Our end-to-end Local Affiliate Product Services (LAPS), with safety-focused industry experts and latest technologies, ensure global consistency at a local country level and compliance with all local safety requirements. From single country, regional, to full international support, the IQVIA LAPS model allows customers to build a strategy that fits their needs while driving operational and budgetary efficiencies.

Worldwide, local expertise

With over 4,000 professionals worldwide and over 600 country-based staff, IQVIA's robust safety organization can provide end-to-end solutions with regulatory-focused medical experts and leading technologies to support your local safety needs.

4,000+

Safety professionals worldwide with 600+ country-based staff

Global presence

In-house support for >170 countries

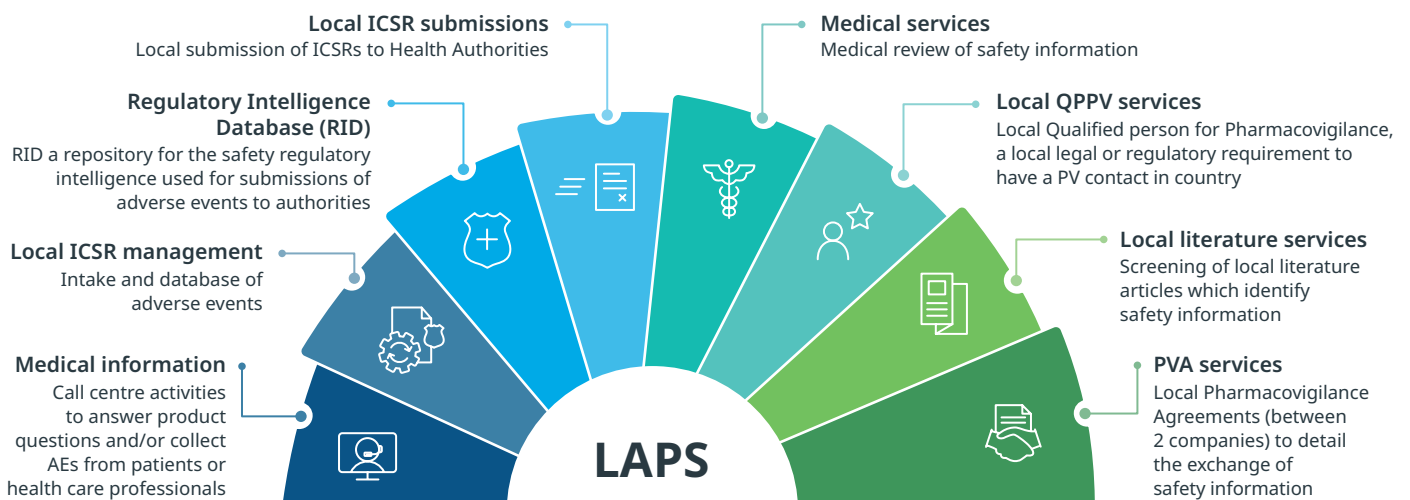

LAPS teams

Composed of clinicians, nurses, pharmacists, and life science degreed individuals with in-depth industry experience, including strong knowledge of local market requirements

50+

Languages with direct local language support and translation capability

End-to-end local safety support

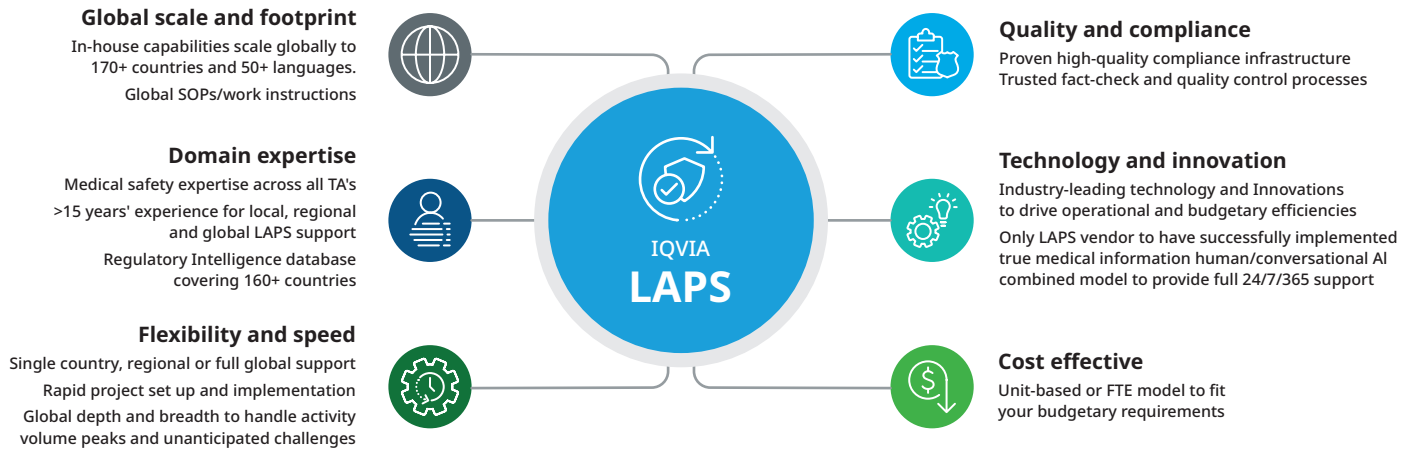

IQVIA supports all local safety activities, including Medical Information, local ICSR management and submissions, medical services, local QPPV services, local Aggregate Reporting, local Literature Review and Local Pharmacovigilance Agreements. These services are supported by IQVIA's proprietary Regulatory Intelligence Database (RID), which provides high quality and detailed insights into local PV reporting requirements. From single country, regional, to full global support, IQVIA LAPS' flexible model allows you to build a strategy that fits your needs while driving operational and budgetary efficiencies and ensuring compliance at a local country level in alignment with global requirements.

LARGE PHARMA TAPS LAPS TO FORM HUB

A top ten pharma engaged IQVIA to consolidate >180 in-country MI and PV activities into a tech enabled regional hub.

IQVIA established a model with >350 FTEs across 40 languages to support the sponsor.

As a result, significant cost savings were realized while the sponsor experienced improved quality, seamless AE handling and centrally standardized governance.

Local safety services powered by IQVIA Connected Intelligence™

Powered by IQVIA Connected Intelligence, LAPS' comprehensive set of Lifecycle Safety services can be provided at a local level, with staff based in country and with required language capabilities. By leveraging IQVIA's talent, experience, and technology-backed solutions, sponsors can realize their customer-centric vision for local country product requirements.

Let's connect so we can learn more about your specific local safety needs and how IQVIA can tailor solutions to help you stay successful in your goals.
