

Meet the new standard
for acceleration:

IQVIA PREDICTIVE CLINICAL DEVELOPMENT

Most delays don't happen in execution—they're built in long before your trial begins. Left unchecked, those signals compound into enrollment delays, amendments, and lost time between phases. The difference isn't working faster. It's seeing earlier—so you can act before delays occur.

SEE

Signals early—across data, design, sites, and execution

DECIDE

Faster, with confidence—before risk compounds

REMOVE

Unworkable paths before they turn into delay

MOVE

Continuously—without resets between phases

2 YRS

saved off your clinical development program timeline

33%

reduction in study start up time

45% - 65%

reduction in down time between phases

42%

higher enrollment rates using IQVIA's top tier sites

50%

faster data cleaning
