

## IQVIA Health data catalog: what?

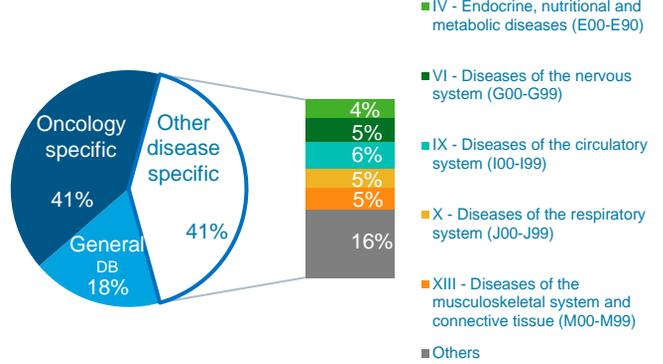

IHDC makes assessing real world data fast and easy with **2,300+** unique **data assets** across **100+** **countries** described by up to **200+ variables**

IHDC is accessible upon subscription, under three formats, to better align with your data sources discovery needs and processes::

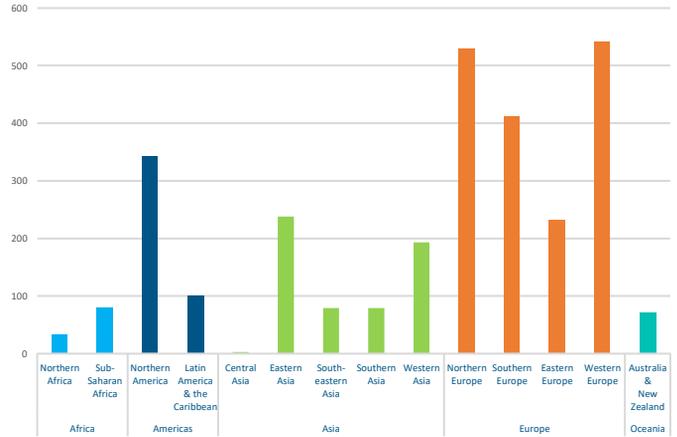

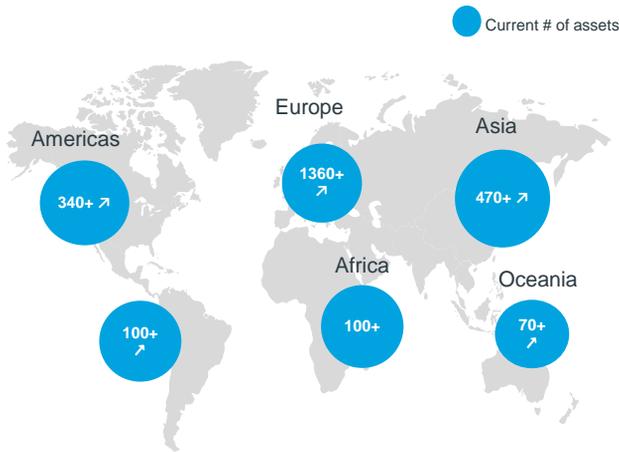

1. **SaaS Syndicated** IQVIA interface & IQVIA content
2. **SaaS proprietary** IQVIA interface + client content
3. **API** (IQVIA content)

1&3 can be combined for maximized value generation

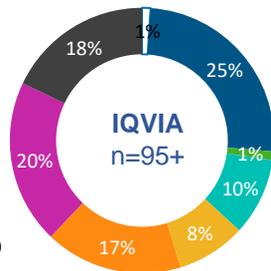

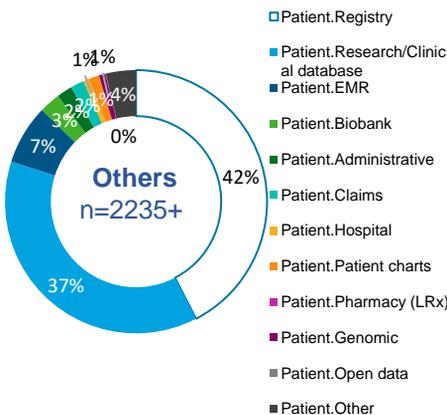

## Data assets per main disease areas

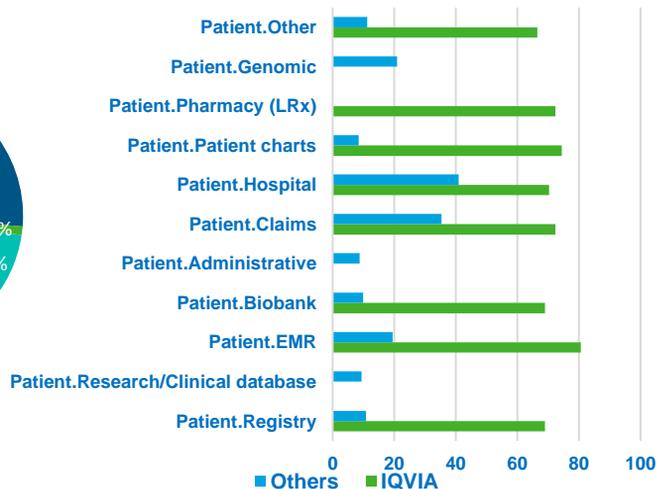

## Data assets per main geographic area

## Type of data

## Average fill-in rate\* percentage per data type

\*Fill in rate: indicator used to measure amount of information completed about a given data assets. % represent the number of items documented out of expected items.

## IQVIA Health data catalog: update status

By pro actively managing the community of data asset owners, in and outside of IQVIA, IHDC's content evolves constantly with new assets and/or listed assets being better qualified: if you cannot find something today you may tomorrow!

**150+ teams** (data holders, SMEs, etc.) involved in the IHDC content orchestration

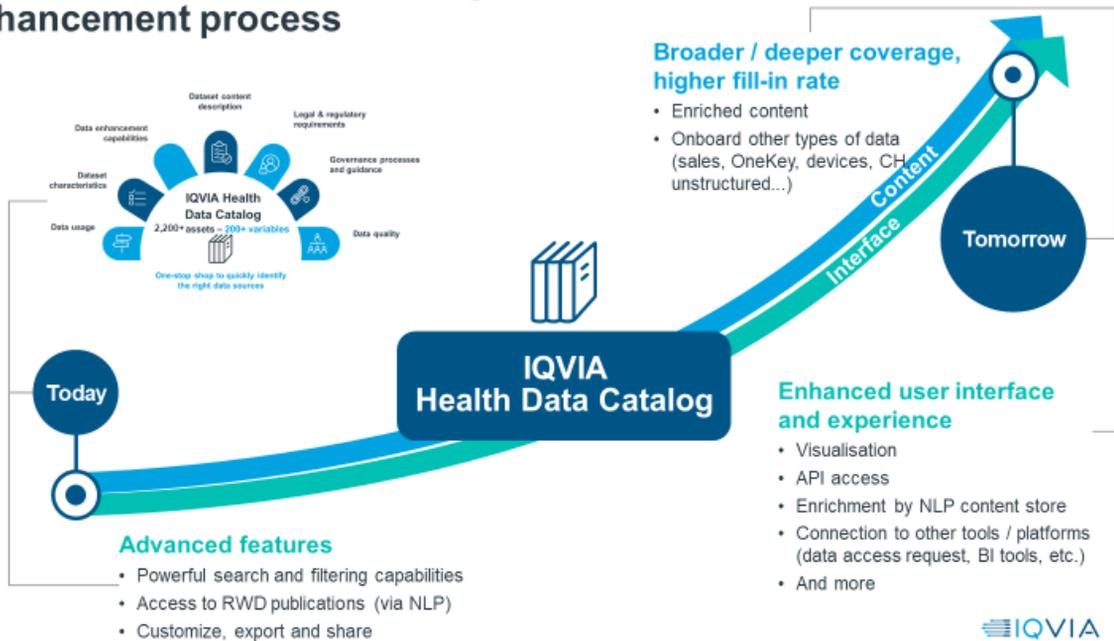

The **# of data assets referenced** has **increased by 160+** since the beginning of the year (new assets were added and some obsolete ones were deleted)

**60+ data assets profiles** have **been updated** over the last 3 months (year to date 170+), resulting in increased average fill-in rate (+2 points on average, up to 30+ points)

## IQVIA Health data catalog: what's next?

### The IQVIA Health Data Catalog: a continuous enrichment and enhancement process

#### Currently in development:

- Enhanced search by disease using free text on 15+ therapeutic areas – Q4 2023 / Q1 2024
- Save search & alerts to avoid re-entering search criteria and being informed when newly referenced assets may be relevant for your research project – Q1 2024
- New user interface – Q1 2024
