

# IQVIA Site Enablement Solutions

Specialty resource solutions customized to your site – where and when it is needed – to support and manage day-to-day clinical trial tasks.

## How it works

Trained, dedicated personnel are selected based on your site's requirements and study needs. Resources are presented to the Principal Investigator (PI) for approval, and the PI then delegates activities such as patient identification, pre-screening, referring physician engagement, study assessments, data management, query resolution, & ongoing patient engagement.

## Specialty resources offered

- Clinical Research Technician (Data Entry)
- Research Assistant
- Study Coordinator
- Study Nurse
- CNS/Neuropsychiatric Rater

## Features and benefits

- Allows site to delegate administrative activities & use highly-skilled, permanent full-time staff to highest potential
- Scalable, customized, & implemented quickly to fit the unique needs of the site
- Terms are flexible and staff can be onsite, remote, or hybrid
- Optimizes patient engagement at your site & enhances patient experience
- Expedites enrollment
- Provided at no out-of-pocket cost to the site

We utilized IQVIA's site support program to focus on patient recruitment and decided to move forward with a remote worker. I was skeptical about utilizing a remote worker, but I have never looked back. Our research assistant was a vital piece to our current success. We jumped for joy when IQVIA approached us in 2022 to offer worker support again.

**Site Director for immunology trial**

I am delighted with this collaboration and am now much more optimistic for the future of these two studies!

**PI for immunology trial**

Our two research assistants have been a tremendous help to our site and – honestly – I am not sure how we could have done what has been done on this trial without their help.

**Research Manager for vaccine trial**

I couldn't have asked for a better experience. We received knowledgeable, friendly staff who were ready and willing to work! From the smallest task to the most complex, they were trained and well-versed in all our needs.
