

IQVIA National Sales and Prescription Insights for Legal Practices

The most trusted data source for accurate measurement of prescription and sales trends that was created for the pharmaceutical industry and leveraged by law firms

Today's reality

When it comes to forecasting, assessing markets, monitoring performance, preparing for a new product launch, or identifying potential acquisition targets, business leaders need to make informed decisions backed by data they can trust.

To get there, teams need access to consistent, reliable information and transparent analytic methodologies. They need to be able to utilize accurate supply and demand analyses and the flexibility to quickly adapt their go-to-market strategies.

Insight into the competitive landscape and the ability to identify rapidly growing areas for product development and launch with critical insights broken down by key therapeutic areas should be foundation to that success.

The right solution — IQVIA National Sales and Prescription Insights

By combining two of IQVIA's foundational, gold standard datasets, National Sales Perspectives (NSP) and National Prescription Audit (NPA), the IQVIA National Sales and Prescription Insights Solution provides deeper insights into new launches, loss of exclusivity, generic market entries, and legislative changes.

NSP measures sales across 13 channels of distribution including retail, non-retail, and mail order that is sourced from more than 500 direct and indirect suppliers.

NPA measures prescriptions dispensed within retail, mail, and long-term care sourced directly from over 49,000 pharmacies.

IQVIA National Sales and Prescription Insights gives law firms clear line of sight, addressing key business questions:

Understand historical sales and script trends as far back as 1992.

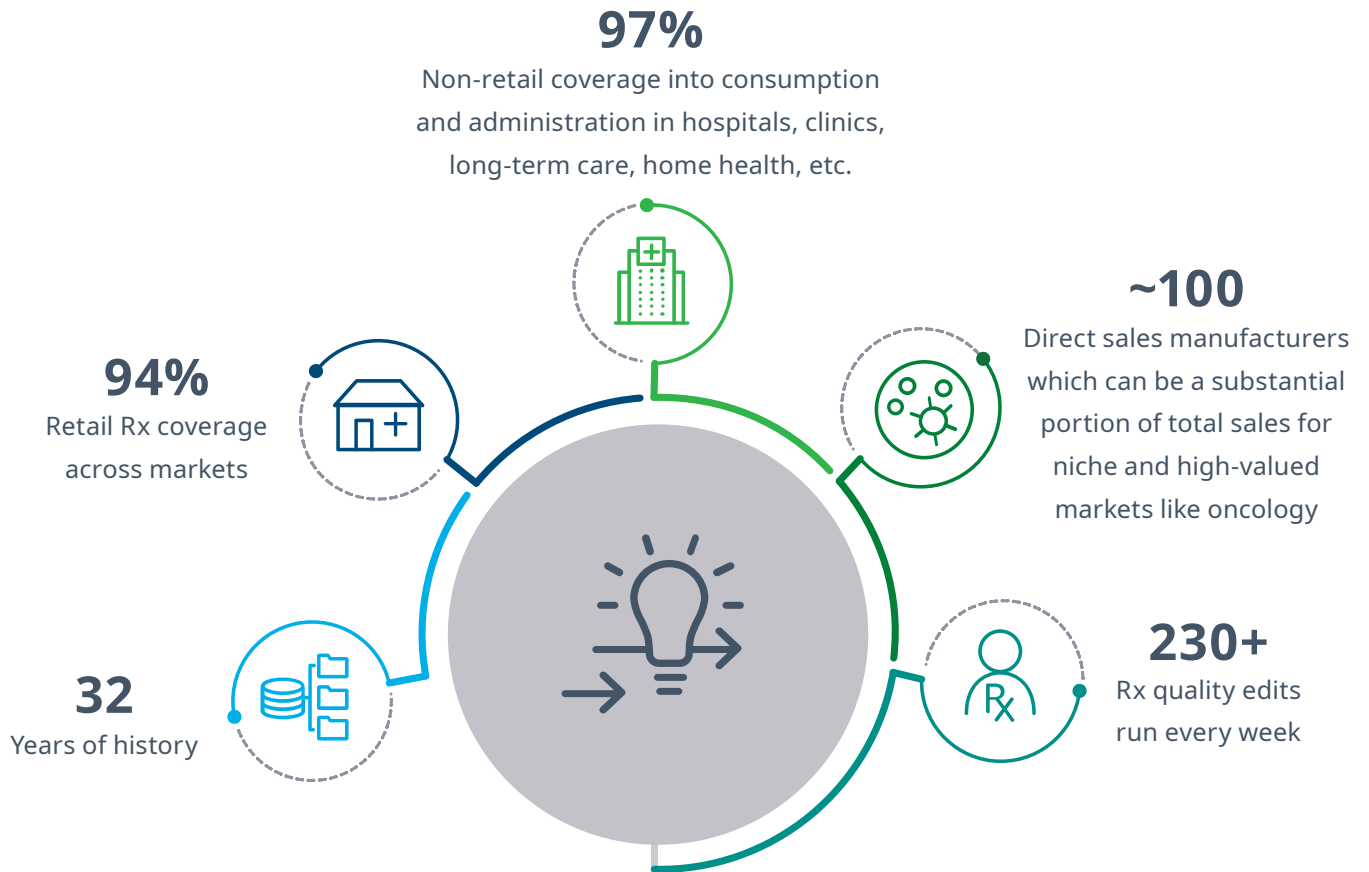

Change in pharmaceutical dynamics over time.

Visibility of product sales and script volumes broken out at manufacturer level.

IQVIA National Sales and Prescription Insights provide a full supply and demand analysis that includes deep insight into the pharmaceutical landscape along with important channel dynamics broken down by individual products at the manufacturer level.

Why IQVIA National Sales and Prescription Insights?

As the most trusted data source in the pharma and financial communities, IQVIA National Sales and Prescription Insights offers comprehensive, consistent, and reliable market coverage with accurate estimations.

Business use cases

RX AND SALES TRENDS FOR MEASUREMENT OVER TIME

- Assess historical sales and prescription patterns from the time when a product was launched.
- Analyze the impact of market events and marketing programs.
- Gain insight into trends for specific patient age and gender groups.
- Visibility of sales and script volumes broken out by state.

Delivery

Reports can be generated for a single product or multiple therapeutic classes, offering detailed insights and comprehensive data. The data refreshes on a weekly, monthly, or quarterly basis, ensuring you always have the latest information. Reports are delivered as Excel files, either via email or SFTP, allowing for secure and efficient transfer.
