

The Cost of 340B to Wyoming

In 2025, workers and employers lost \$12 million in negotiated rebates to 340B

Despite advocates' claims that the 340B program is free, it raises costs for patients, employers, state and local governments, Medicare, and managed Medicaid. One way it increases costs is by displacing the negotiated rebates that are used to lower net drug prices. Research by IQVIA shows that workers and employers lost \$14.5 billion in rebates nationally in 2025 due to 340B.¹ The cost to Wyoming workers and employers in 2025 was \$12 million.

Wyoming has lower 340B utilization than neighboring states, leaving substantial headroom for growth as large hospital systems and contract pharmacy networks continue to expand their footprint in the state.
