

Quintiles Infosario® CTMS (Clinical Trial Management System)

Better Quality and Effectiveness at Lower Cost

What if you could increase the quality and effectiveness of your clinical trial management system (CTMS) while minimizing investment? Imagine if you had a fully hosted, global CTMS that provided scalable functionality across multiple business processes.

Cloud-Based Velocity and Operational Agility

Generate heightened performance and efficiency with Quintiles Infosario® CTMS, a cloud-based system that provides:

- > *Reduced information technology (IT) costs*
- > *Enhanced productivity*
- > *Faster, smoother implementation*
- > *Increased system confidence*

Award-Winning IT Innovation

Infosario CTMS provides a centralized location for capturing, viewing, and sharing clinical trial data—from site identification to study closeout. It provides a seamlessly integrated way to:

- > *Track, manage, and consolidate data*
- > *Standardize processes within and across functions*
- > *Integrate with complementary systems*
- > *Meet current and future regulatory demands*

Quintiles Infosario earned Quintiles the #1 *InformationWeek* 500 rating for IT innovation in the biotechnology & pharmaceutical category

Reduced IT Costs

The Infosario CTMS system eliminates the need to build and maintain your own system. You avoid the significant financial and resource investments in IT, while reducing deployment risk.

Faster, Smoother Deployment at Lower Risk

Backed by our best-in-class standard operating procedures and comprehensive training and support, the Infosario CTMS system accelerates scale-up and reduces the chance of failure often associated with integrating a newly built, enterprise-wide system.

Successfully used within Quintiles to manage clinical trials worldwide, our CTMS is scalable to any size biopharmaceutical organization. This solution can grow with you to encompass all or part of your portfolio, as needed.

Enhanced Productivity and End-to-End Functionality

The Infosario CTMS system offers enhanced productivity and end-to-end functionality.

- > *Integrates easily with complementary systems*
- > *Ensures data standardization, streamlined data entry*
- > *Facilitates operational and transactional reporting*
- > *Enables better performance tracking*
- > *Allows more timely, informed decisions across the life of your trials*

End-to-End Functionality			
Document Tracking	Investigator Payments	Site Contact Data	Activities and Tasks
Regulatory Submission/Ethics Approval	Investigator Repository	Site Visits and Trip Reports	Monitoring Plan Activities
Site Identification	Recruitment Tracking	Investigator Contract Tracking	CRF/Forms Tracking
Source Data Verification Tracking	Protocol Deviation Tracking	Adverse Event Tracking	Communications/Call Log Tracking

Confidence Equals Peace of Mind

Leveraging almost 30 years of clinical and systems expertise, Quintiles has carefully created this offering to address unique industry and regulatory challenges. The Infosario CTMS system gives you comprehensive visibility across your projects—turning potential challenges into a competitive advantage.

About Quintiles Infosario Systems

Quintiles' hosted solutions offer a new way to improve productivity, efficiency, and value, while avoiding the cost of purchasing, validating, and maintaining IT systems on your own. These solutions, including Infosario Safety, Infosario CTMS, Infosario eTMF, Infosario Labs, and Infosario Data Exchange, provide customers with access to best-of-breed commercial platforms and proprietary technologies, augmented by Quintiles' leading clinical expertise.

Customized for Your Needs

Quintiles Infosario systems feature pioneering integration and virtualization of the entire portfolio of clinical applications and technologies required to successfully carry out clinical development programs. Running in the Quintiles cloud, you have access to the capabilities needed to fulfill all or part of your IT requirements. No matter which solutions you use, you always have access to Quintiles Infosario's comprehensive data integration and data-driven work processes. Quintiles hosted systems are built to adapt as your needs change.
