

Plan and manage clinical trials with clarity and confidence

Accurately identify opportunities and avoid obstacles throughout the clinical trial process with IMS Health Clinical Trial Optimization Solutions

Deliver on-time, on-budget clinical trials by confidently planning and managing the process using real-time insights

Clinical trials habitually run over schedule and over budget. The costs of trial over-runs are staggering: an average of \$35,000 per day delay, plus the millions in lost revenue opportunities.

CLINICAL TRIAL challenges

48% of trial sites miss enrollment targets*

80% of trials run behind schedule

11% of investigators never enroll a patient

Grants increase an average of 7% per year

* Tufts Center for the Study of Drug Development, 2013

MAP THE BEST COURSE WITH EARLY FEASIBILITY AND PLANNING...

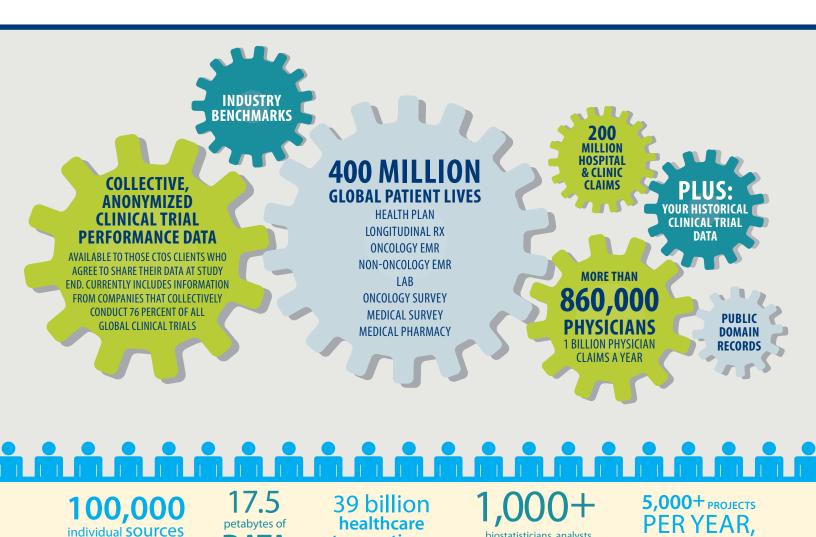

Now, using IMS Health Clinical Trial Optimization Solutions, you can efficiently model multiple courses of action using the most complete global data with the full understanding of fair market value and standard of care. Negotiate grants with confidence with the full understanding of fair market value and standard of care to ensure full reimbursements. Then, develop several pathways to take your trial from plan to completion, and compare the time and cost consequences of each.

...ADJUST TO CHANGING CONDITIONS WITHOUT EXCESSIVE DELAY AND COST

As your trial moves forward, leverage IMS Health Clinical Trial Optimization Solutions to identify any new challenges or opportunities, based on changing conditions. Compare options to discover the fastest and least expensive alternatives to help keep your trial on track for successful completion.

IMS Health Clinical Trial Optimization Solutions enables early identification of trial challenges, allowing you to make informed action plans to avoid them.

To learn more about this powerful suite of data-driven software solutions, call 484.567.6343 or email your questions to clinicaltrials@IMSHealth.com.

Clinical trial forecasting — Powered by the extraordinary healthcare data resources from IMS Health

transactions

per year

DATA

annually

& suppliers

biostatisticians, analysts,

economists, clinicians & other

advanced experts

serving the top 15

pharma companies

Accurate forecasting and planning start with insights into the difficulties that can be foreseen and the actions that are taken to address or avoid them. These insights come from leveraging multiple types of data, analyzed to enlighten the problem set and used at key points in the decision process. IMS Health offers you the most extensive healthcare data resources in the world, checked and standardized through the most rigorous and advanced systems in the industry.

Clean, HIPAA compliant and standardized through IMS Health protocols for the most consistent and accurate outcomes.

FORECAST, MANAGE AND REPORT ON YOUR STUDIES WITH CONFIDENCE

Assess

with a 360-degree view of your market landscape

Analyze

variables that impact your ability to execute

Competitive and Market Intelligence

- Incidence and prevalence
- Competing products currently on the market
- Analysis and feasibility services
- I/E criteria analysis
- Site profiling
- Patient profiling
- Risk factors to recruitment
- Standard of care impact
- Recruitment and retention challenges

Enrollment Planning and Forecasting — IMS Health StudyOptimizer^M and SiteOptimizer^M

- Industry enrollment benchmarks
- Industry dropout rates
- Site identification in relevant indication
- Site start-up and performance metrics
- Site access to relevant patients

- Site-to-patient proximity
- Operational plan time and cost impact
- Optimal start-up plan and contingencies
- Optimal country allocations
- KPI correlations

Operationalize

with real-time insights to optimize your course and ensure delivery against plan

- Competitive landscape monitoring
- Course correction insights based on market data
- Real-time forecasts of trial completion
- Budget projections
- Rescue plan modeling
- Patient recruitment campaign ROI

 Detailed site-level budgets, long-range forecasting and cost containment

Country and site allocation feasibility and

Ongoing budget management, adjustment

Investigator grant negotiation and status

Data to support Sunshine Act requirements

Protocol amendment impact

compliance considerations

CRO RFP status and selection

and justification

Contingency site analysis and recommendations

Cost Benchmarking and Forecasting — IMS Health GrantPlan™, StandardOfCare™, CostPro™and IISiS™

- Fair market value of investigator grants
- Procedures routinely covered by thirdparty insurers in a given indication
- Site-level counteroffer and comments
- Grant negotiation timelines
- Fair market value of outsourcing activities
- Fair market value of activities in investigator-initiated studies

- Detailed line item costs
- Forecasting for cost per patient by phase, indication and country
- Industry benchmarks and historical data for sites and activity level
- Standard of care procedure details by visit
- Cost analysis per study by category, pass-throughs
- Country and site-level overhead
- Current negotiation status
- CRO RFP analysis and evaluation

Full-Service Data-Driven Software Solutions

- Recommended country participation
- Locate target subjects and sites
- Conduct early risk analysis

- Operational impact of competitive products
- Recommended operational plan
- SWOT analysis of program plan
- Recruitment and retention considerations
- Development of site list vs. site master file
- Management of strategy, enrollment performance and cost
- Seamless service offering with dedicated FTE

IMS Health StudyOptimizer[™] **Optimal Enrollment Plans**

- Model various enrollment alternatives and their budget impacts
- Predict enrollment outcomes with precision based on study performance
- Monitor and report on progress

IMS Health SiteOptimizer[™] **Productive Sites**

- · Pinpoint investigators and sites with a track record of success
- Avoid nonproductive sites or those that have compliance issues
- Easily identify the patient location for specific diseases

Which sites consistently float to the top of

our trials?

 Identify investigators with the most patients for certain indications

Based on the predictive forcast, will we achieve the plan goal?

What plan

variables impact time and cost?

FEASIBILITY
